SUBJECT INDEX

α-Laplace distribution 118
abelian group 250
assymptotic formula for gamma functions 10
autoregressive process 103
balanced coin 22
Bernoulli number 10
Bernoulli polynomial 10
Bernoulli probability law 29
Bernoulli process 102
Bernstein function 114
beta density type-1 40
beta density type-2 40
beta function 39
beta integral type-1 39
beta integral type-2 39
binomial probability law 28
bivariate distribution 159
Boxe-Einstein density 29
Brownian process 104
Caputo derivative 178
Cauchy density 30
centre of gravity 32
Chapman-Kolmogorov equation 108
characteristic function 33
concomitant 155
conditional density 36
convolution property 20
covariance 38
Cubic elliptic functions 239

Cubic theta functions 241
cumulative probability 23
density distribution 213
density function 25
density, exponential 26
density, uniform 27
Dirichlet densities 42
Dirichlet density type-1 44
Dirichlet density type-2 44
Dirichlet integrals 42
distribution function 25
determinant 8
elliptic functions 221
energy generation 218
event 21
Exercises 11,14,19,29,37,48,53,60,64, 72,75,78,81,83,84,86,87,90,111,120, 127,136,142, 151,179,182,185,199, 205,208,223,224,227,232,234,246
Expected value 31
Fermi-Dirac density 30
Fick's diffusion 208
Fourier transform 19
Fourier transform 207
fractional diffusion 196
gamma density 27
gamma function 3
Gamma,generalized 30
Gauss 49
Gaussian process 100
Gauss-Markov setup 166
geometrically infinitely divisible 113
g-inverse 271
Gram-schmidt procedure 261
Helley's density 30
Helmert density 30
hypergeometric series 49
incomplete gamma function 49
independent increment 99
Infinite divisibility 112
inner product 259
integral transforms 15
Jacobi elliptic functions 229
Jacobian 7
Kober operators 183
Kummer's 49
Laplace transform 18
Laplace transform, fractional integral 175
Laplace fractional derivative 177
Laplace inverse 175
Legendre formula 224
linear correlation 38
linear independence 253
linear transformations 263
logistic distribution 163
marginal density 35
Markov chain 106
Marshall-Olkin generalized Weibull distribution 148
Marshall-Olkin Weibull Process 143
Maxwell-Boltzmann density 30
mean value 32
Mellin transform 15,180
Mellin inverse 180
Mellin fractional derivative 181
Mittag-Leffler distribution 117
Mittag-Leffler functions 195
moment generating function 33
Moore-Penrose inverse 286

Morgenstern distribution 159
multinomial probability 35
mutually exclusive event 21
Normal/Gaussian density 30
normalizing constant 29
null set, impossible event 21
Order statistics 155
orthonormal basis 260
parallelogram law 259
parameters 48
Poisson probability law 28
Poisson process 103
polarization identity 289
probability function 23
probability of an event 22
Psi function 12
r^{th} moment 32
r^{th} central moment 32
Ramanujan identity 227
random experiment 21
random variable, discrete 23
record values 163
References 172, 208, 220, 246, 287
residue 17
Riemann-Liouville integrals 195
Riemann-Liouville derivatives 195
sample space 21
Schwartz's inequality 259
self-decomposability 115
semi-Pareto distribution 119
solar models 213
stable distribution 116
standard deviation 32
stationary increment 99
Stirling's approximation 10
Stochastic processes 93
sure event 21
symmetry in outcomes 22
Taboo probabilities 110
tailed process 138
Telegraph signal process 103
Time series 93
Time series modelling 93
totally exhaustive event 22
uniform distribution 159
variance 32
vector space 250
Winer process 104
Zeta function 12
Zorn's lemma 256
